NARRATIIVE

GROWTH BLUEPRINT / 2026

KatKin

The science cats deserve

From category claim to category authority

INTERNAL REVIEW DRAFT - HUMAN APPROVAL REQUIRED

The brief isn't 'build more brand awareness' - it's 'find what only KatKin can prove'

Wrong question: how to out-spend or out-create competitors on reach, given KatKin already runs 300+ active paid-social ads and ships roughly 114 new creatives a week. Right question: what can KatKin claim permanently that a funded rival cannot replicate in one ad cycle, and does that claim still work once personalisation disappears at retail. This Blueprint…

COMMERCIAL CONSEQUENCE

Redirects the CMO mandate from spend-led awareness building toward asset-led differentiation, changing what gets resourced next quarter.

Five forces are closing the window, and none are solved by more paid reach

SAMENESS

Shared functional language

ECONOMICS

Paid creative pressure

THE PRESSURE

Category functional language has commoditised across DTC entrants. Discovery is shifting toward organic and AI search, where a lower-funded rival…

DISCOVERY

Organic and AI search shift

MANDATE

Build a loved brand

COMMERCIAL CONSEQUENCE

Establishes urgency to act within the current planning cycle, directly tied to a loss-making position that shortens the decision window.

Every brand says the same thing; only one has the published proof to say something else

THE HARD PART IS ALREADY DONE

Across DTC competitors, 'real meat, no fillers, vet-formulated' is now shared vocabulary - Untamed uses it near-verbatim on a fraction of KatKin's funding. No competitor has claimed independent, peer-reviewed proof as owned territory, because…

Independent research changes the basis of competition.

COMMERCIAL CONSEQUENCE

Converting this gap into owned territory could reduce reliance on functional-claim parity and support earned, not only paid, discovery - a mechanism, not a guaranteed outcome.

KatKin did the hard, expensive part of proof - and is marketing the easy, copyable part instead

WHAT OWNERS SEE

Confident claims

Fresh. Real meat. Vet formulated.

THE GAP

WHAT KATKIN CAN PROVE

Independent science

The tension at the centre of this Blueprint: owners are shown assertion-led claims when KatKin's real edge is evidence-led. Whether consumers reward independently verified…

COMMERCIAL CONSEQUENCE

Forces an explicit choice before committing production budget: build around proof (higher differentiation, higher validation risk) or stay on shared claims (lower risk, no new dif…

KatKin's loudest signal reaches the one audience it has already won

01

Motivation

Confidence in doing right by the cat

02

Barrier

Premium price and change anxiety

03

Trigger

Independent proof at the decision moment

COMMERCIAL CONSEQUENCE

Prevents over-resourcing creative for an audience that is already converting, at the expense of the two pools carrying the real growth prize.

Three growth pools need three different jobs from the same proof

01

Committed DTC

Keep belief. Reduce churn.

02

Retail converts

Earn confidence without a quiz.

03

Mainstream owners

Make proof legible at a glance.

COMMERCIAL CONSEQUENCE

Directs investment sequencing by evidence confidence, not assumed importance - the mainstream pool should be validated before media spend is committed to it.

The trust-builder that works in a DTC quiz cannot survive three seconds on a shelf

01

Motivation

Confidence in doing right by the cat

02

Barrier

Premium price and change anxiety

03

Trigger

Independent proof at the decision moment

COMMERCIAL CONSEQUENCE

Prevents a single creative asset being asked to do five different jobs; each stage gets its own measurable mechanism and owner.

Decision one: what KatKin stands for - proof, not promise

POSITION	Proof, not promise
BENEFIT	Confidence without self-audit
PLATFORM	The science cats deserve
EXPRESSION	Visible without personalisation

COMMERCIAL CONSEQUENCE

Gives every team one falsifiable sentence to brief from, replacing today's message drift across paid, CRM and retail.

Decision two: what the owner should feel - confidence, not persuasion

POSITION	Proof, not promise
BENEFIT	Confidence without self-audit
PLATFORM	The science cats deserve
EXPRESSION	Visible without personalisation

COMMERCIAL CONSEQUENCE

If validated, shifts creative briefs from 'prove the food works' to 'prove you don't need to take our word for it' - a different commercial case for performance-marketing teams.

Decision three: the story that carries it - 'The Science Cats Deserve'

1

TENSION

The category asks owners to trust claims

2

SHIFT

KatKin makes proof the starting point

3

RESOLUTION

Independent science carries the decision

THE SCIENCE CATS DESERVE

COMMERCIAL CONSEQUENCE

One flexible story could reduce reliance on the current high-volume weekly creative production needed to sustain differentiation, if the shelf and CRM translations hold up under t…

Decision four: how it shows up unaided - one proof, three executions

1

TENSION

The category asks owners to trust claims

2

SHIFT

KatKin makes proof the starting point

3

RESOLUTION

Independent science carries the decision

THE SCIENCE CATS DESERVE

COMMERCIAL CONSEQUENCE

Equips CRM and retail teams with one shared brief instead of two diverging narratives, reducing coordination cost between DTC and retail functions.

The prize is pricing power and cheaper growth - not simply more reach

EARNED

A citable point of view

RETAIL

Premium proof at shelf

CRM

Segmented confidence

INVESTOR

Earlier leading signals

COMMERCIAL CONSEQUENCE

Frames the shift in terms investors already track - pricing power and CAC - without asserting unverified numbers.

Retail has three seconds to do what CRM does in three emails

DTC QUIZ	Discovery and education	Personalised
CRM	Trust and retention	First party
RETAIL	Conversion	Unaided
EARNED / SEARCH	Scale discovery	Citable
PAID SOCIAL	Volume	Rebalanced

COMMERCIAL CONSEQUENCE

Rebalances channel investment toward mechanisms that can compound without continuous paid spend, directly answering the rising-CAC constraint named earlier.

Validate before you commit - founder sign-off gates the final narrative lock

DTC QUIZ	Discovery and education	Personalised
CRM	Trust and retention	First party
RETAIL	Conversion	Unaided
EARNED / SEARCH	Scale discovery	Citable
PAID SOCIAL	Volume	Rebalanced

COMMERCIAL CONSEQUENCE

Sequences spend so the cheapest, highest-confidence validation step happens before any retail or creative production investment is committed.

Prove the shift is working before revenue can show it

DAYS 1-30

Foundation

Founder pressure-test Claims and evidence audit

DAYS 31-60

Launch

Retail translation test CRM segmentation pilot

DAYS 61-90

Scale

Read leading signals Shift spend only when proven

COMMERCIAL CONSEQUENCE

Gives the founder and investors a credible early read on strategy health ahead of the stated runway checkpoint, directly addressing the loss-making position named at the outset.

THE MANDATE

Own the proof.

Make it easy to feel.

Then earn the right to scale.

IMMEDIATE NEXT STEP

Founder pressure-test and retail translation test
