NARRATIIVE

GROWTH BLUEPRINT / 2026

LOA

Own the brighter pause

A conditional route from distinctive bottle to repeatable demand

INTERNAL FICTIONAL DEMONSTRATION - HUMAN APPROVAL REQUIRED

What the commercial opportunity looks like

Scenario	Annual revenue	Conversion	Year 1 contribution	Net after investment
Downside	£115k	1.8%	£1k	**-£64k**
Base	£547k	2.4%	£67k	**£2k**
Upside	£884k	2.6%	£140k	**£75k**

30% CONTRIBUTION, £65k INVESTMENT AND SCENARIO RAMP ARE ASSUMPTIONS. NOT A PROFIT FORECAST.

COMMERCIAL CONSEQUENCE

The base scenario adds £443,520 of annualised revenue headroom. The base case produces a £1,528 first-year contribution proxy after £65,000 of assumed investment. Verify every input before committing.

SOURCES: A1, A2, A3, A7, A8, A9

MODELLED - SCENARIO, NOT FORECAST

What currently prevents growth

CURRENT ASSET

A bottle people may notice

Distinctive visual assets are useful, but not proof of demand or repeat.

THE GAP

WORKING CONSTRAINT

No proven repeat path

Working diagnosis only. Falsify it by: Reject this diagnosis if founder, customer and cohort evidence already shows a clear occasion, strong unprompted proposition recall and profitable repeat without increased discounting.

COMMERCIAL CONSEQUENCE

LOA may have a memorable bottle, but it has not yet proved the specific occasion, reason to choose or route from first taste to profitable repeat.

SOURCES: A4

ASSUMPTION

NARRATIIVE

The strategic moves

OWN THE BRIGHTER PAUSE

Qualified demand and conversion

Founder interview, occasion research and controlled proposition test

MAKE THE POUR THE PROOF

Comprehension, trial and memorability

Creative recognition, comprehension and qualified sample-to-site test

TURN TRIAL INTO REPEAT

Repeat and distribution productivity

One-city cohort test of repeat and retailer sell-through

COMMERCIAL CONSEQUENCE

Own the brighter pause, make the pour the proof, then turn concentrated trial into measured repeat.

SOURCES: A4, A5, A6, A7, A8, A9, C1, C2, E1, E2

ASSUMPTION

What the future could look like

A Brighter Pour

Turn the small social pause into something vivid: an unmistakable LOA pour, served with food, colour and a little ceremony.

CREATIVE ILLUSTRATION

Fictional visual proof. Test relevance, distinctiveness and product comprehension before selection.

SOURCES: A5, C1, C2

NARRATIIVE

The Opportunity

The base case produces a £1,528 first-year contribution proxy after £65,000 of assumed investment. Verify every input before committing.

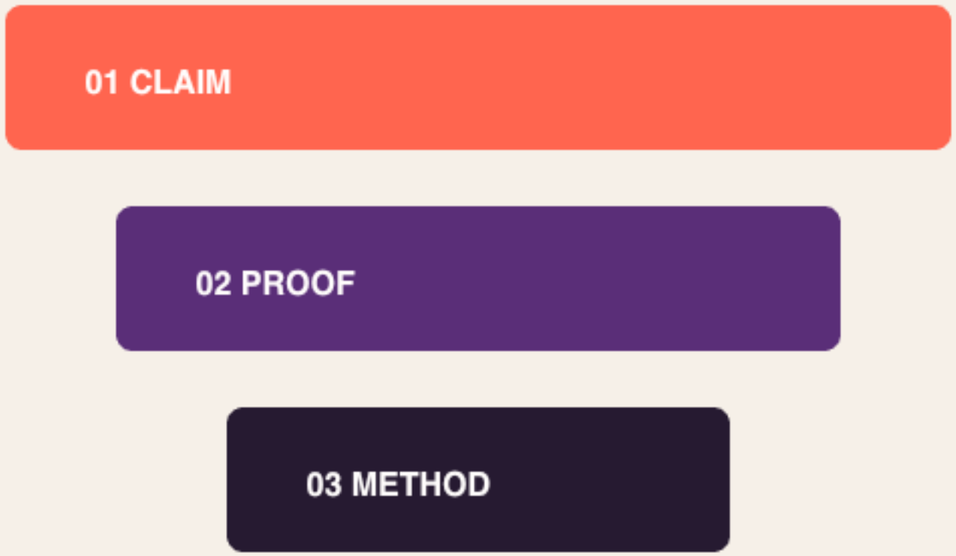

COMMERCIAL CONSEQUENCE

LOA could test an annualised ecommerce revenue scenario of £547,200, £443,520 above the assumed baseline.

SOURCES: A1, A2, A3, A7, A8, A9

MODELLED

The scenario bridge

The sequential bridge reconciles to £443,520. The attribution order is a modelling convention.

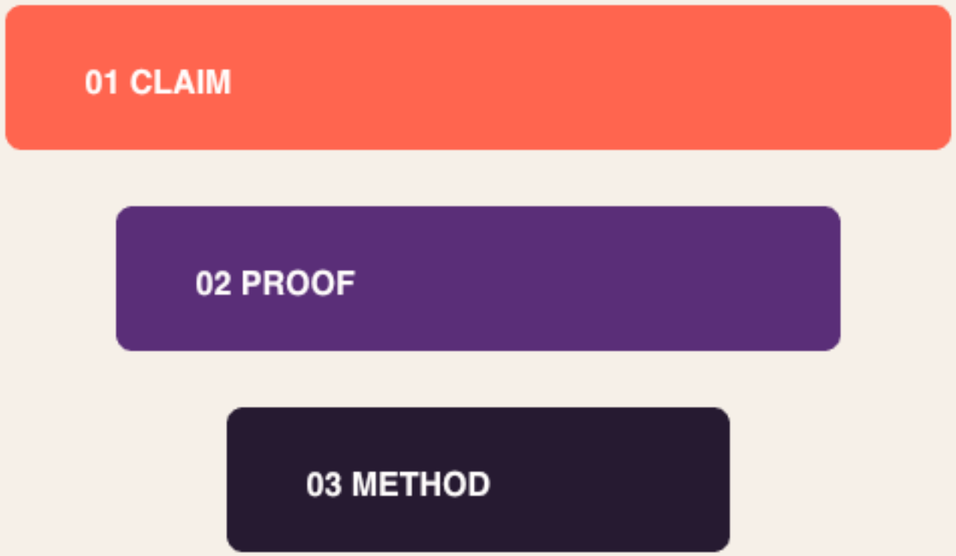

COMMERCIAL CONSEQUENCE

Traffic contributes £241,920; Conversion contributes £115,200; Average order value contributes £86,400.

SOURCES: A1, A2, A3, A7, A8, A9

MODELLED

The Constraint

Reject this diagnosis if founder, customer and cohort evidence already shows a clear occasion, strong unprompted proposition recall and profitable repeat without increased discounting.

COMMERCIAL CONSEQUENCE

LOA may have a memorable bottle, but it has not yet proved the specific occasion, reason to choose or route from first taste to profitable repeat.

SOURCES: A4

ASSUMPTION

What would disprove the diagnosis

Reject this diagnosis if founder, customer and cohort evidence already shows a clear occasion, strong unprompted proposition recall and profitable repeat without increased discounting.

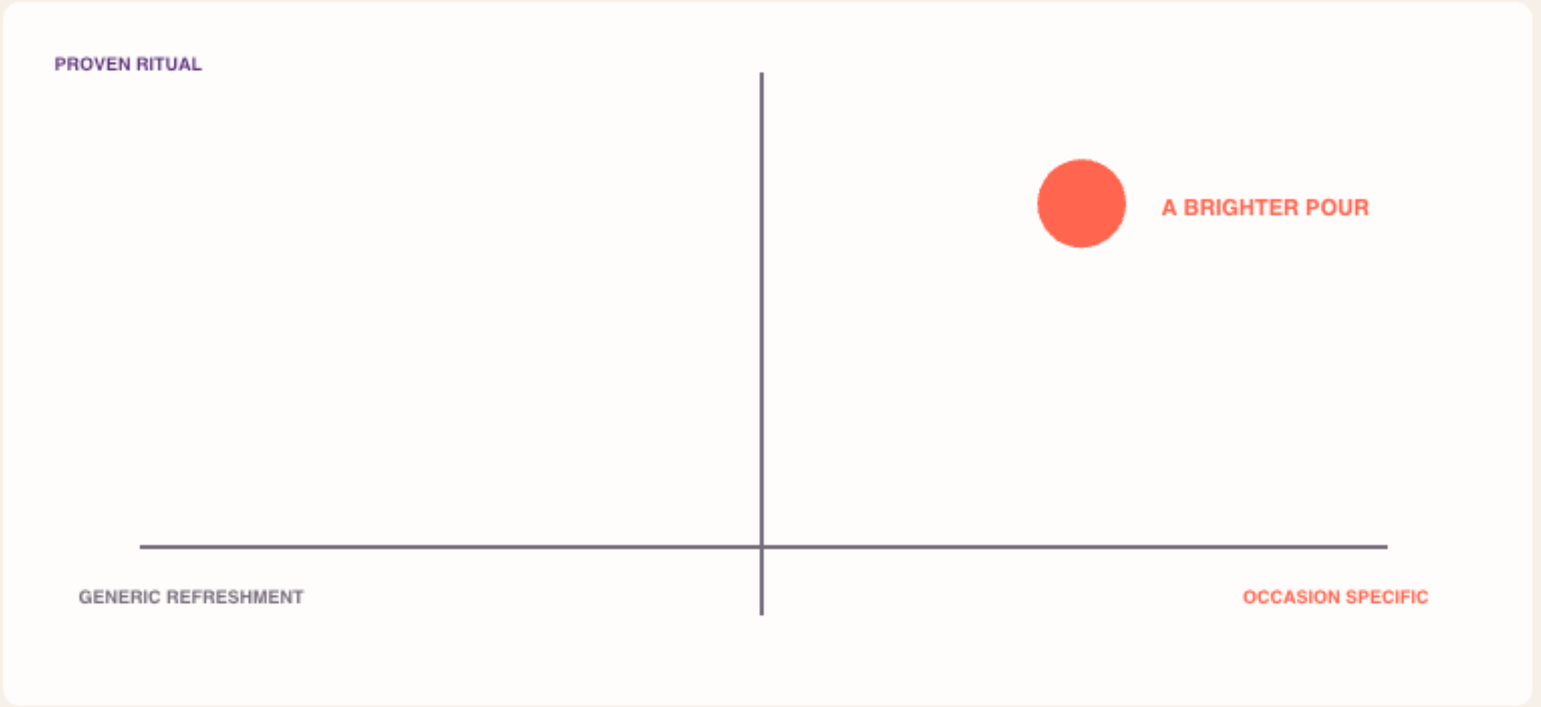

COMMERCIAL CONSEQUENCE

The diagnosis fails if LOA already owns a clear occasion and existing cohorts repeat profitably without heavier discounting.

SOURCES: A4

ASSUMPTION

The Advantage

THE GAP

A vivid adult soft-drink ritual for everyday social pauses

WHO IT MATTERS TO

Adults seeking a grown-up soft option; definition requires research

WHY COMPETITORS MISS IT

No competitor position is asserted until research is completed.

COMMERCIAL CONSEQUENCE

LOA could turn its coral bottle and optimistic visual language into a recognisable adult soft-drink ritual: a brighter pour for social pauses that deserve more than water and less than alcohol.

SOURCES: A5, C2

ASSUMPTION

The advantage needs proof

EVIDENCE TO COLLECT

CUSTOMER EVIDENCE REQUIRED

Map real social pauses

Test the bright-pour proposition

Measure trial and repeat

BRAND ASSET	A distinctive bottle illustration
CUSTOMER DATA	Not yet supplied
CHOICE TEST	Required before selection

The territory remains a hypothesis until customer choice and repeat evidence support it.

COMMERCIAL CONSEQUENCE

Founder conviction can frame a hypothesis. Customer choice data must decide whether the advantage is real.

SOURCES: A5, C2

ASSUMPTION

The Strategy

1

TENSION

A memorable bottle without a proven buying occasion

2

SHIFT

Make the LOA pour the recognisable ritual

3

RESOLUTION

Link concentrated trial to measured repeat before reach

Give LOA one social job, then make the pour earn the next purchase.

COMMERCIAL CONSEQUENCE

Give LOA one ownable social job, make the bright-pour ritual unmistakable, then connect selective trial to measured repeat before buying reach.

SOURCES: A4, A5, A6, A7, A8, A9, C1, C2, E1, E2

ASSUMPTION

Three moves, three tests

01 / OWN THE BRIGHTER PAUSE

ROLE	Qualified demand and conversion
TENSION	A sharper occasion excludes generic refreshment traffic and must earn credibility.
PROOF	Founder interview, occasion research and controlled proposition test
ASSET	Strategy Director

02 / MAKE THE POUR THE PROOF

ROLE	Comprehension, trial and memorability
TENSION	Product-centred work will reveal any weakness in taste, pack, serve or availability.
PROOF	Creative recognition, comprehension and qualified sample-to-site test
ASSET	Creative Director

03 / TURN TRIAL INTO REPEAT

ROLE	Repeat and distribution productivity
TENSION	Geographic focus slows broad awareness while protecting cash and learning quality.
PROOF	One-city cohort test of repeat and retailer sell-through
ASSET	Growth Strategy Director

VERBAL ASSETS

ASSUMPTION

The Creative Future

POUR BRIGHTER

meets

MAKE THE PAUSE MATTER

01 PRODUCT FIRST

Bottle, opening and pour are the mnemonic

02 APPETITE

Food, glass, bubbles and condensation stay tactile

03 ORDINARY TO VIVID

Colour arrives through the serve, not visual noise

COMMERCIAL CONSEQUENCE

A Brighter Pour: Turn the small social pause into something vivid: an unmistakable LOA pour, served with food, colour and a little ceremony.

SOURCES: A5, C1, C2

CREATIVE ILLUSTRATION

NARRATIIVE

The campaign behaviour

A six-second film opens on the flat hum of a convenience-store cooler. A coral LOA bottle is lifted, opened and poured beside a late lunch; the scene warms as the bubbles rise.

01

PRODUCT FIRST

Bottle, opening and pour are the mnemonic

02

APPETITE

Food, glass, bubbles and condensation stay tactile

03

ORDINARY TO VIVID

Colour arrives through the serve, not visual noise

COMMERCIAL CONSEQUENCE

Turn the small social pause into something vivid: an unmistakable LOA pour, served with food, colour and a little ceremony.

SOURCES: A5, C1, C2

CREATIVE ILLUSTRATION

NARRATIIVE

The Growth Engine

Selective wholesale	Place LOA inside the target occasion and observe sell-through	Stockist economics, weekly sell-through and reorder
Sampling and partnerships	Create qualified first taste around food, design and culture	Permission, sample-to-site capture, cost and product feedback
Owned DTC and CRM	Convert mixed-case trial into measured replenishment	Net conversion, second purchase, opt-out and contribution
Paid social	Scale only the creative and occasions already linked to repeat	Incremental contribution after production and media cost

COMMERCIAL CONSEQUENCE

Use one city and a small number of food-led occasions to connect observed trial, DTC capture, replenishment and retailer sell-through before any national awareness spend.

SOURCES: A6, A7, A8, A9

ASSUMPTION

Measurement before scale

LEADING	Brand attribution, occasion comprehension, qualified sample-to-site and retailer availability
BEHAVIOURAL	Net conversion, mixed-case uptake, second purchase, retailer sell-through and reorder
COMMERCIAL	Contribution after product, fulfilment, sampling, production, media and distribution

COMMERCIAL CONSEQUENCE

Leading indicators must move before the plan releases larger media or inventory commitments.

SOURCES: A6, A7, A8, A9

ASSUMPTION

The Next 12 Months

Months 1-3

Establish the truth

Verify unit economics, formulation and availability; interview founder, customers and trade; test three occasion propositions.

Months 4-6

Prove the brighter pour

Run controlled creative, sampling, DTC capture and one-city wholesale tests using approved claims and assets.

Months 7-9

Build the repeat system

Codify winning serve, content, CRM, replenishment and retailer reorder mechanics.

COMMERCIAL CONSEQUENCE

A staged validation programme protects cash while the business replaces assumptions with evidence.

SOURCES: A4, A5, A6, A7, A8, A9, C1, C2, E1, E2, E3

ASSUMPTION

Evidence and assumptions ledger (1 of 2)

ID	Class	Claim in this Blueprint	What would verify it
E1	VERIFIED EXTERNAL	The UK government announced that the lower Soft Drinks Industry Levy sugar threshold will reduce from 5g to 4.5g per 100ml from January 2028.	Confirm the final legislation and verify LOA recipes independently before making any formulation claim.
E2	VERIFIED EXTERNAL	The UK government reported a 46% average reduction in sugar content in in-scope soft drinks between 2015 and 2020.	Use the latest official category data and obtain product-level evidence before commercial use.
E3	VERIFIED EXTERNAL	The British Soft Drinks Association's 2025 annual report states that more than seven in ten UK soft drinks sold are low or no sugar.	Recheck the original report and triangulate with independent retail and customer evidence.
A1	ASSUMPTION	LOA receives 180,000 ecommerce sessions per year.	Reconcile an authorised GA4 export to ecommerce sessions and orders.
A2	ASSUMPTION	LOA converts 1.8% of ecommerce sessions to orders.	Agree the denominator and reconcile sessions to completed non-refunded orders.
A3	ASSUMPTION	LOA has a £32 average ecommerce order value before returns, discounts and VAT treatment.	Calculate realised order value from an authorised transaction export.
A4	ASSUMPTION	LOA's principal growth constraint is an attractive visual identity without a sufficiently specific occasion, proposition or trial-to-repeat system.	Run founder interviews, occasion research, proposition testing and a controlled conversion test.
A5	ASSUMPTION	LOA could build an advantage by pairing its distinctive bottle with a clear role as the bright adult soft drink for social pauses.	Test the territory against category alternatives with target customers and trade buyers.

No verified client evidence appears in this fictional sample. Real external market context does not verify fictional company performance.

SOURCES: E1, E2, E3, A1, A2, A3, A4, A5

EVIDENCE REGISTER

Evidence and assumptions ledger (2 of 2)

ID	Class	Claim in this Blueprint	What would verify it
A6	ASSUMPTION	A city-led sampling, selective wholesale, DTC replenishment and CRM growth engine is operationally feasible.	Obtain contribution, capacity, distribution and cohort data before any activation.
A7	ASSUMPTION	Incremental ecommerce revenue contributes 30% after product, fulfilment, payment, returns and incremental media costs.	Reconcile order-level net revenue and variable cost by product and channel.
A8	ASSUMPTION	LOA could realise 30% to 60% of annualised ecommerce scenario headroom during the first 12 months.	Build a monthly plan with test velocity, stock capacity and seasonality.
A9	ASSUMPTION	The first 12 months require £65,000 of incremental implementation investment beyond the £5,000 Growth Blueprint fee.	Obtain a costed activation plan before approval.
C1	CREATIVE ILLUSTRATION	A Brighter Pour is an illustrative campaign territory for fictional LOA.	Check strategic fit, distinction, comprehension and legal availability.
C2	CREATIVE ILLUSTRATION	Paul's existing LOA coral bottle hero and convenience-store film are reused as internal creative illustrations.	Paul and Matt must confirm provenance, usage rights, product accuracy and client-facing suitability.

No verified client evidence appears in this fictional sample. Real external market context does not verify fictional company performance.
