NARRATIIVE

GROWTH BLUEPRINT / 2026

FIELDWORK

Own the mixed-use surface

A conditional route from first object to repeat purchase

INTERNAL FICTIONAL DEMONSTRATION - HUMAN APPROVAL REQUIRED

What the commercial opportunity looks like

Scenario	Annual revenue	Conversion	Year 1 contribution	Net after investment
Downside	£1.35m	2.1%	£17k	**-£68k**
Base	£1.89m	2.4%	£121k	**£36k**
Upside	£2.27m	2.6%	£223k	**£138k**

32% CONTRIBUTION, £85k INVESTMENT AND SCENARIO RAMP ARE ASSUMPTIONS. NOT A PROFIT FORECAST.

COMMERCIAL CONSEQUENCE

The base scenario adds £690,000 of annualised revenue headroom. The base case produces a £36,440 first-year contribution proxy after £85,000 of assumed investment. Verify every input before committing.

SOURCES: A1, A2, A3, A8, A9, A10

MODELLED - SCENARIO, NOT FORECAST

What currently prevents growth

CURRENT PATTERN

Reach before reason

A broad catalogue asks paid media to create the distinction.

THE GAP

WORKING CONSTRAINT

No proven repeat path

Working diagnosis only. Falsify it by: Reject this diagnosis if a specific mixed-use proposition does not improve qualified product-page progression and net conversion, or if existing cohorts already show strong second-purchase behaviour.

COMMERCIAL CONSEQUENCE

FIELDWORK is buying attention for a broad design promise before it has proved why a mixed-use household should choose its first object or return for the second.

SOURCES: A4

ASSUMPTION

NARRATIIVE

The strategic moves

OWN THE MIXED-USE SURFACE

Qualified conversion

Controlled message and landing-page test

MAKE USEFULNESS VISIBLE

Conversion and average order value

Product-story comprehension and basket test

EARN THE SECOND OBJECT

Second-purchase economics

Cohort retention and referral pilot

COMMERCIAL CONSEQUENCE

Own the mixed-use surface, make usefulness visible, then earn the second object before scaling acquisition.

SOURCES: A4, A5, A6, C1

ASSUMPTION

What the future could look like

Built for the work of living

Objects designed for the table where invoices, lunch, school drawings and late calls all happen.

CREATIVE ILLUSTRATION

Fictional visual proof. Test relevance, distinctiveness and product comprehension before selection.

SOURCES: A5, C1

NARRATIIVE

CREATIVE ILLUSTRATION

The Opportunity

The base case produces a £36,440 first-year contribution proxy after £85,000 of assumed investment. Verify every input before committing.

COMMERCIAL CONSEQUENCE

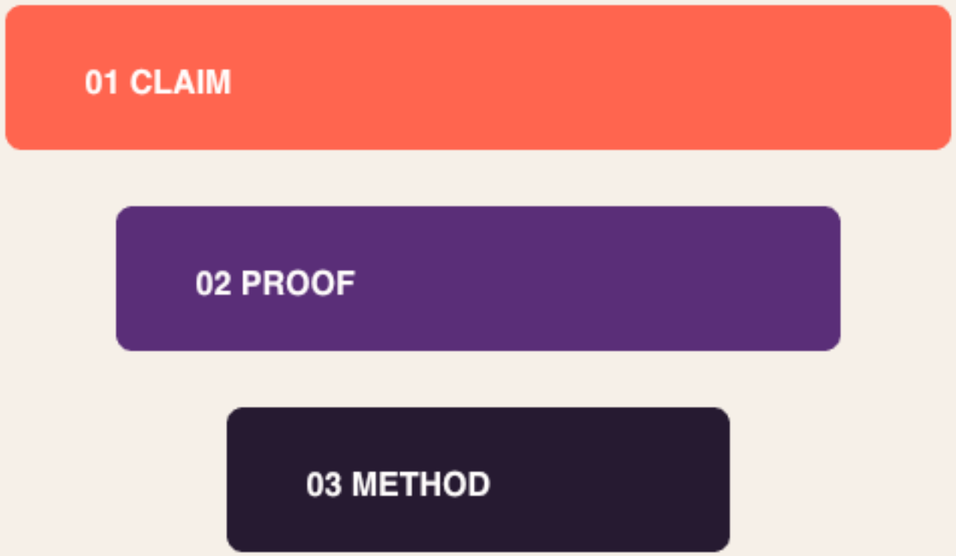

FIELDWORK could test an annualised ecommerce revenue scenario of £1,890,000, £690,000 above the assumed baseline.

SOURCES: A1, A2, A3, A8, A9, A10

MODELLED

NARRATIIVE

The scenario bridge

The sequential bridge reconciles to £690,000. The attribution order is a modelling convention.

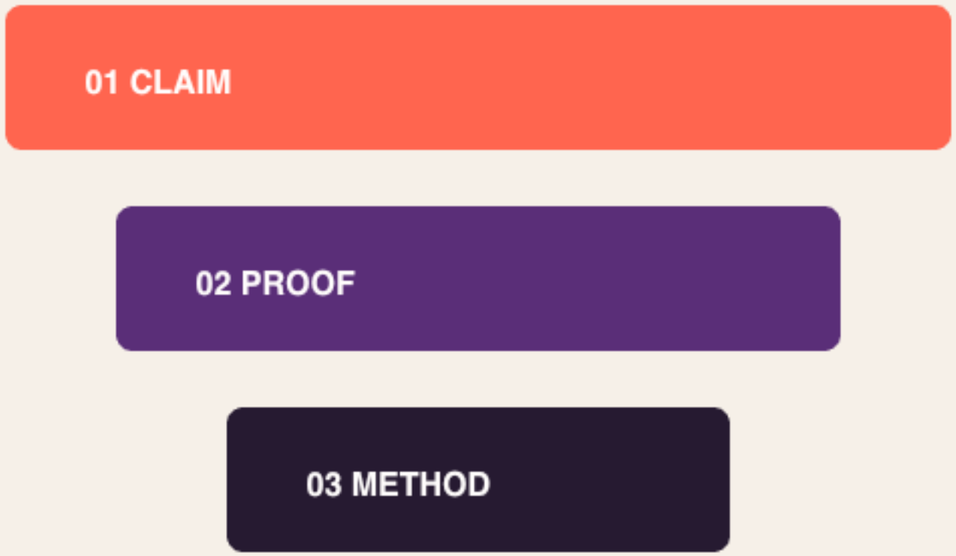

COMMERCIAL CONSEQUENCE

Traffic and conversion each account for £300,000 of the base case. Higher order value accounts for £90,000.

SOURCES: A1, A2, A3, A8, A9, A10

MODELLED

The Constraint

Reject this diagnosis if a specific mixed-use proposition does not improve qualified product-page progression and net conversion, or if existing cohorts already show strong second-purchase behaviour.

COMMERCIAL CONSEQUENCE

FIELDWORK is buying attention for a broad design promise before it has proved why a mixed-use household should choose its first object or return for the second.

SOURCES: A4

ASSUMPTION

What would disprove the diagnosis

Reject this diagnosis if a specific mixed-use proposition does not improve qualified product-page progression and net conversion, or if existing cohorts already show strong second-purchase.

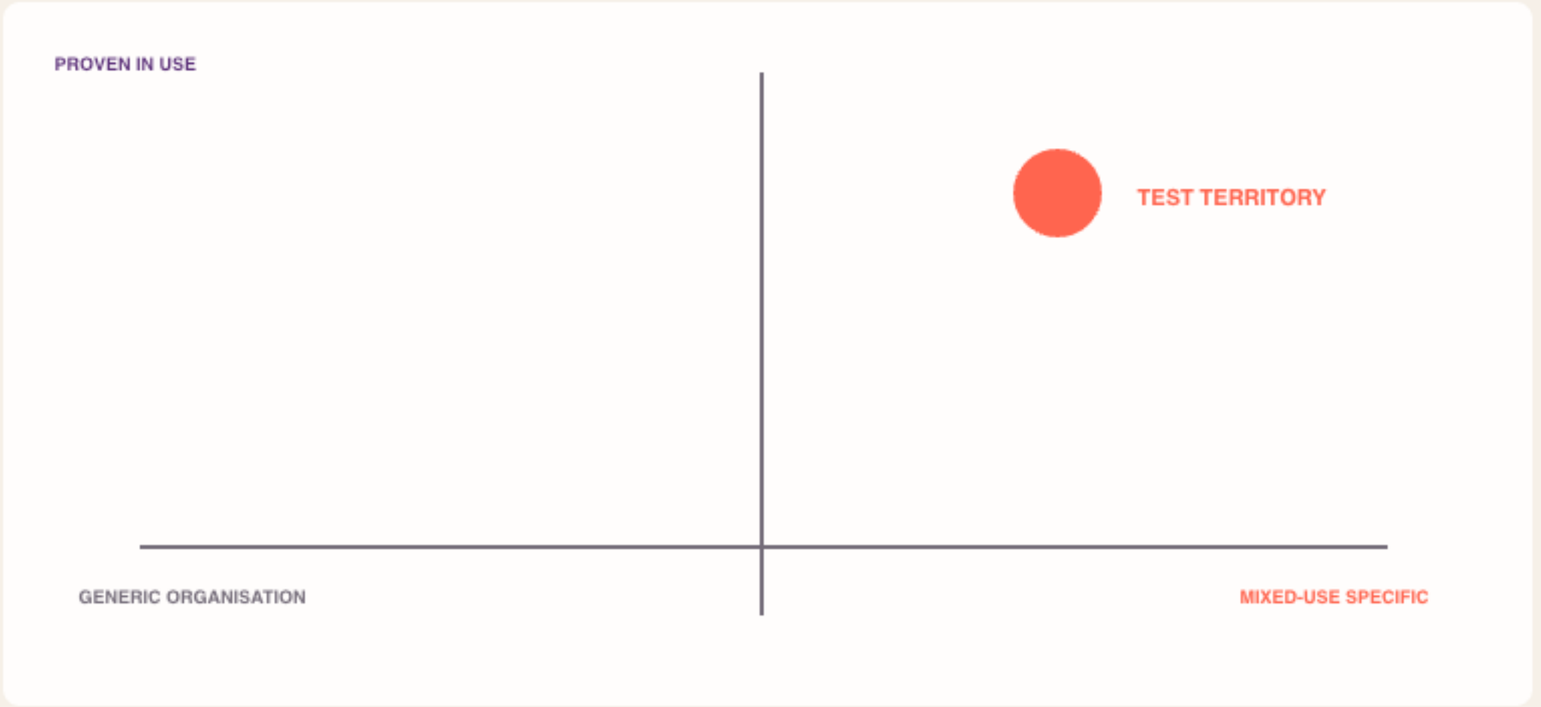

COMMERCIAL CONSEQUENCE

The diagnosis fails if a specific mixed-use proposition does not improve net conversion or existing cohorts already repeat strongly.

SOURCES: A4

ASSUMPTION

The Advantage

THE GAP

Modular objects for surfaces shared by work and life

WHO IT MATTERS TO

People whose home workspace disappears and reappears every day

WHY COMPETITORS MISS IT

Validation required. No competitor position is asserted in this fictional fixture.

COMMERCIAL CONSEQUENCE

FIELDWORK could own the mixed-use surface: modular objects designed for the daily collision of paid work, domestic life and limited space.

SOURCES: A5

ASSUMPTION

The advantage needs proof

EVIDENCE TO COLLECT

CUSTOMER EVIDENCE REQUIRED

Observe how shared surfaces are reset

Test the mixed-use proposition

Measure willingness to pay

FOUNDER VIEW	A proposed category to own
CUSTOMER DATA	Not yet supplied
CHOICE TEST	Required before selection

The territory remains a hypothesis until observed behaviour and customer choice evidence support it.

COMMERCIAL CONSEQUENCE

Founder conviction can frame a hypothesis. Customer choice data must decide whether the advantage is real.

SOURCES: A5

ASSUMPTION

NARRATIIVE

The Strategy

1

TENSION

Broad accessories compete on taste and paid attention

2

SHIFT

Own the mixed-use surface and show usefulness in context

3

RESOLUTION

Let the first object earn the second before buying reach

Turn one useful object into a reason to return.

COMMERCIAL CONSEQUENCE

Turn the mixed-use surface into a category FIELDWORK can own, then prove that one useful object earns the next purchase before scaling acquisition.

SOURCES: A4, A5, A6, C1

ASSUMPTION

NARRATIIVE

Three moves, three tests

01 / OWN THE MIXED-USE SURFACE

ROLE	Qualified conversion
TENSION	A narrower promise may reduce broad but low-intent traffic.
PROOF	Controlled message and landing-page test
ASSET	Strategy Director

02 / MAKE USEFULNESS VISIBLE

ROLE	Conversion and average order value
TENSION	More proof requires disciplined production and may expose weak claims.
PROOF	Product-story comprehension and basket test
ASSET	Creative Director

03 / EARN THE SECOND OBJECT

ROLE	Second-purchase economics
TENSION	Near-term reach grows more slowly while economics are validated.
PROOF	Cohort retention and referral pilot
ASSET	Strategy Director

VERBAL ASSETS

ASSUMPTION

The Creative Future

USEFUL BY DESIGN

meets

HUMAN IN PRACTICE

01 OBSERVE

Real work leaves traces

02 PROVE

Materials and use stay visible

03 REPEAT

One warm orange work mark

COMMERCIAL CONSEQUENCE

Built for the work of living: Objects designed for the table where invoices, lunch, school drawings and late calls all happen.

SOURCES: A5, C1

CREATIVE ILLUSTRATION

NARRATIIVE

The campaign behaviour

A film keeps the camera on one dining table as invoice, lunch, school drawing and late call replace each other. The FIELDWORK object stays, adapts and gathers the day's essential tools.

01

OBSERVE

Real work leaves traces

02

PROVE

Materials and use stay visible

03

REPEAT

One warm orange work mark

COMMERCIAL CONSEQUENCE

Objects designed for the table where invoices, lunch, school drawings and late calls all happen.

SOURCES: A5, C1

CREATIVE ILLUSTRATION

NARRATIIVE

The Growth Engine

Owned site	Prove the proposition and convert qualified demand	Message comprehension and net conversion
CRM	Build repeat, cross-sell and referral evidence	Cohort contribution and opt-out guardrail
Paid social	Scale tested creative and proposition routes	Incremental contribution after creative and media cost
Partnerships	Reach relevant work and design communities	Qualified traffic and assisted conversion

COMMERCIAL CONSEQUENCE

Use the owned site to prove the mixed-use proposition, then use the first object to earn a second purchase before paid media scales the system.

SOURCES: A6

ASSUMPTION

Measurement before scale

LEADING	Proposition comprehension, qualified click-through, product-page progression
BEHAVIOURAL	Net conversion, average order value, repeat and referral
COMMERCIAL	Contribution after returns, fulfilment, media and implementation

COMMERCIAL CONSEQUENCE

Leading indicators must move before the plan releases larger media or inventory commitments.

SOURCES: A6

ASSUMPTION

The Next 12 Months

Months 1-3

Establish the truth

Verify economics, interview customers and test three proposition routes.

Months 4-6

Prove the proposition

Run controlled site, product-story and CRM tests with contribution guardrails.

Months 7-9

Build the engine

Codify winning creative, CRM and referral mechanics and assess capacity.

COMMERCIAL CONSEQUENCE

A staged validation programme protects cash while the business replaces assumptions with evidence.

SOURCES: A4, A5, A6, A7, C1

ASSUMPTION

NARRATIIVE

Evidence and assumptions ledger

ID	Class	Claim in this Blueprint	What would verify it
A1	ASSUMPTION	FIELDWORK receives 600,000 ecommerce sessions per year.	Reconcile an authorised GA4 export to ecommerce platform sessions and orders.
A2	ASSUMPTION	FIELDWORK converts 2.0% of ecommerce sessions to orders.	Agree the conversion denominator and reconcile sessions to completed non-refunded orders.
A3	ASSUMPTION	FIELDWORK has a £100 average order value before returns and discounts.	Calculate net realised order value from an authorised transaction export.
A4	ASSUMPTION	The principal growth constraint is a broad proposition that gives qualified buyers too little reason to choose FIELDWORK.	Run founder interviews, proposition testing and a controlled landing-page conversion test.
A5	ASSUMPTION	FIELDWORK can build an advantage around objects designed for the overlap between work and home life.	Test relevance, distinctiveness and willingness to pay with target customers.
A6	ASSUMPTION	A proposition-led acquisition, conversion and retention programme is operationally feasible.	Obtain channel spend, contribution margin, stock capacity and cohort retention before scale.
A7	ASSUMPTION	A staged 12-month validation programme is affordable and resourced.	Scope the work, cost each phase and secure named owner commitments.
A8	ASSUMPTION	Incremental revenue contributes 32% after returns, fulfilment, payment fees and incremental media.	Reconcile order-level net revenue and variable costs by product and channel.
A9	ASSUMPTION	The business realises 35% to 65% of annualised scenario headroom in the first 12 months.	Build a monthly implementation plan with test cadence, seasonality and operational capacity.
A10	ASSUMPTION	The first 12 months require £85,000 of incremental implementation investment beyond the Growth Blueprint fee.	Obtain a costed delivery plan and separate one-off, variable and internal costs.
C1	CREATIVE ILLUSTRATION	Built for the work of living is an illustrative creative territory for FIELDWORK.	Test strategic fit, distinctiveness, comprehension and trademark risk before selection.

No verified client or external evidence appears in this fictional sample. Every claim remains tied to a validation step.
