NARRATIIVE

GROWTH BLUEPRINT / 2026

FIELDWORK

A conditional 12-month opportunity

Fictional demonstration. Human approval required.

What the commercial opportunity looks like

Scenario	Annual sessions	Conversion	Average order	Annual revenue
Downside	630,000	2.1%	£102	£1,349,460
Base	750,000	2.4%	£105	£1,890,000
Upside	810,000	2.6%	£108	£2,274,480

ILLUSTRATIVE ANNUALISED SCENARIOS. INPUTS ARE ASSUMPTIONS, NOT COMPANY FORECASTS.

COMMERCIAL CONSEQUENCE

The base scenario adds £690,000 in annualised revenue before cost, margin and ramp effects.

SOURCES: A1, A2, A3

MODELLED - SCENARIO, NOT FORECAST

What currently prevents growth

CURRENT PATTERN

Broad but forgettable

The proposition tries to serve every moment.

THE GAP

WORKING CONSTRAINT

Weak reason to choose

Working diagnosis only. Falsify it by: If a clearer proposition fails to improve qualified landing-page progression and purchase intent versus the current message, reject this diagnosis.

COMMERCIAL CONSEQUENCE

The working constraint is proposition clarity, not reach: FIELDWORK has no validated reason for qualified buyers to choose it over familiar alternatives.

SOURCES: A4

ASSUMPTION

The strategic moves

SHARPEN THE PROMISE

Qualified conversion

Controlled message and landing-page test

PROVE THE PRODUCT STORY

Conversion and average order value

Product-story comprehension and basket test

EARN REPEAT BEFORE REACH

Repeat revenue and allowable acquisition cost

Loyalty, retention and referral pilot

COMMERCIAL CONSEQUENCE

Prioritise a sharper proposition, prove it in conversion and build repeat before scaling acquisition.

SOURCES: A4, A5, A6, C1

ASSUMPTION

NARRATIIVE

What the future could look like

USEFUL BY DESIGN

made

HUMAN IN PRACTICE

01 OBSERVE

Real work leaves traces

02 PROVE

Materials and use stay visible

03 REPEAT

One warm orange work mark

COMMERCIAL CONSEQUENCE

Objects that respect the untidy overlap between useful work and a life worth living.

SOURCES: A5, C1

CREATIVE ILLUSTRATION

NARRATIIVE

The Opportunity

Validate the baseline and economics before treating the scenario as an investment case.

COMMERCIAL CONSEQUENCE

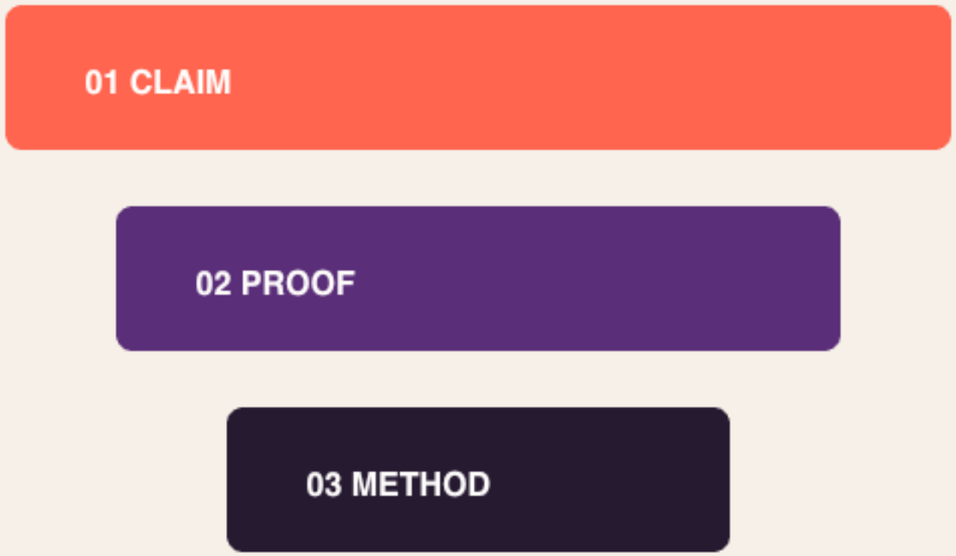

FIELDWORK could test an annualised ecommerce revenue scenario of £1,890,000, £690,000 above the assumed baseline.

SOURCES: A1, A2, A3

MODELLED

NARRATIIVE

The scenario bridge

The sequential bridge reconciles to £690,000. The attribution order is a modelling convention.

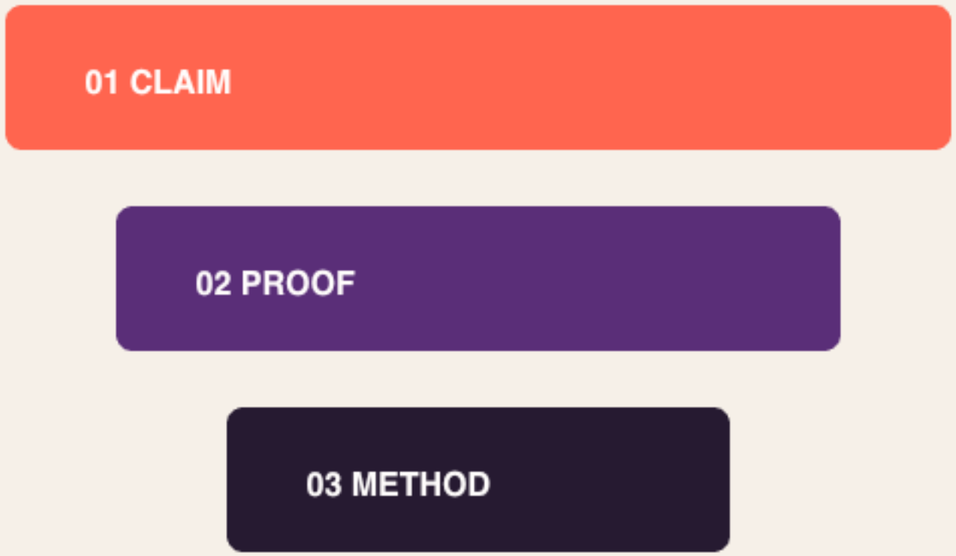

COMMERCIAL CONSEQUENCE

Traffic and conversion each account for £300,000 of the base case. Higher order value accounts for £90,000.

SOURCES: A1, A2, A3

MODELLED

The Constraint

If a clearer proposition fails to improve qualified landing-page progression and purchase intent versus the current message, reject this diagnosis.

COMMERCIAL CONSEQUENCE

The working constraint is proposition clarity, not reach: FIELDWORK has no validated reason for qualified buyers to choose it over familiar alternatives.

SOURCES: A4

ASSUMPTION

What would disprove the diagnosis

If a clearer proposition fails to improve qualified landing-page progression and purchase intent versus the current message, reject this diagnosis.

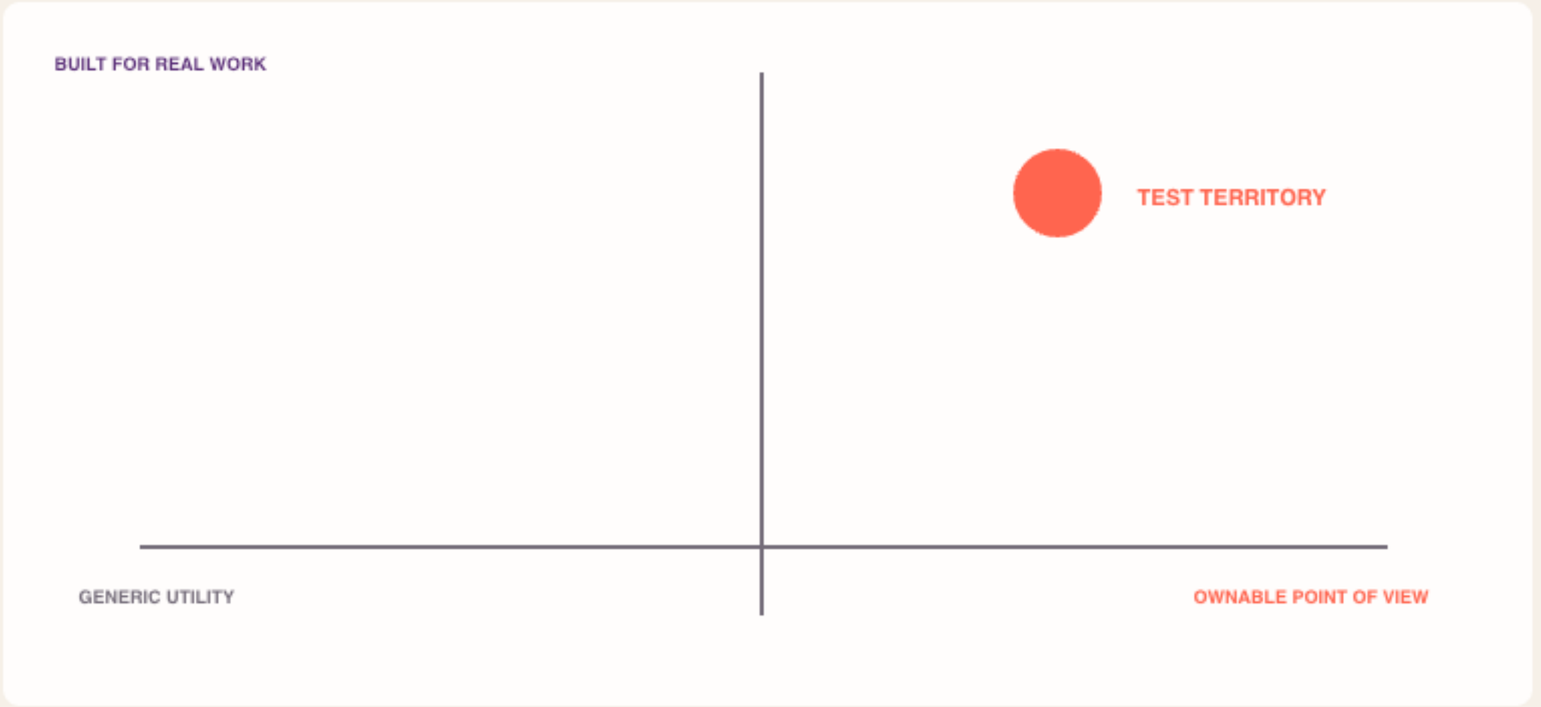

COMMERCIAL CONSEQUENCE

The constraint changes if proposition clarity fails to improve qualified conversion in a controlled test.

SOURCES: A4

ASSUMPTION

The Advantage

THE GAP

Design for real work and real homes

WHO IT MATTERS TO

People who refuse to choose between utility and identity

WHY COMPETITORS MISS IT

Validation required. No competitor research is asserted in this fixture.

COMMERCIAL CONSEQUENCE

The proposed advantage is practical design for the overlap between work and home, expressed with more honesty and character than generic productivity products.

SOURCES: A5

ASSUMPTION

The advantage needs proof

CUSTOMER LANGUAGE

NO CUSTOMER QUOTES OR RESEARCH SUPPLIED

“Needs validation”

“Needs validation”

“Needs validation”

FOUNDER VIEW	A proposed advantage
CUSTOMER DATA	Missing
CHOICE TEST	Required

Treat the proposed advantage as a hypothesis until real preference and conversion evidence exists.

COMMERCIAL CONSEQUENCE

Founder conviction can frame a hypothesis. Customer choice data must decide whether the advantage is real.

SOURCES: A5

ASSUMPTION

The Strategy

1

TENSION

Useful products disappear into category sameness

2

SHIFT

Make real work the point of view

3

RESOLUTION

Prove the proposition before buying reach

Make modern work at home more useful and recognisable.

COMMERCIAL CONSEQUENCE

Make modern work at home more useful and recognisable.

SOURCES: A4, A5, A6, C1

ASSUMPTION

NARRATIIVE

Three moves, three tests

01 / SHARPEN THE PROMISE

ROLE	Qualified conversion
TENSION	A narrower promise may reduce broad but low-intent traffic.
PROOF	Controlled message and landing-page test
ASSET	Strategy Director

02 / PROVE THE PRODUCT STORY

ROLE	Conversion and average order value
TENSION	More proof requires disciplined production and may expose weak claims.
PROOF	Product-story comprehension and basket test
ASSET	Creative Director

03 / EARN REPEAT BEFORE REACH

ROLE	Repeat revenue and allowable acquisition cost
TENSION	Near-term reach grows more slowly while economics are validated.
PROOF	Cohort retention and referral pilot
ASSET	Strategy Director

VERBAL ASSETS

Specific promise · Visible proof

TONE + MOTION

Direct · Useful

RECURRING FORMATS

Claim and proof · Test and result

COMMERCIAL CONSEQUENCE

The strategy connects each recommendation to a measurable commercial lever.

ASSUMPTION

The Creative Future

USEFUL BY DESIGN

meets

HUMAN IN PRACTICE

01 OBSERVE

Real work leaves traces

02 PROVE

Materials and use stay visible

03 REPEAT

One warm orange work mark

COMMERCIAL CONSEQUENCE

Built for the work of living: Objects that respect the untidy overlap between useful work and a life worth living.

SOURCES: A5, C1

CREATIVE ILLUSTRATION

NARRATIIVE

A tangible territory

01

OBSERVE

A short film follows one desk object across a day: invoice, lunch, school drawing, late call.

02

MARK

A short film follows one desk object across a day: invoice, lunch, school drawing, late call.

03

SIGNAL

A short film follows one desk object across a day: invoice, lunch, school drawing, late call.

COMMERCIAL CONSEQUENCE

Objects that respect the untidy overlap between useful work and a life worth living.

SOURCES: A5, C1

CREATIVE ILLUSTRATION

NARRATIIVE

The Growth Engine

Owned site	Prove the proposition and convert qualified demand	Message comprehension and net conversion
CRM	Build repeat, cross-sell and referral evidence	Cohort contribution and opt-out guardrail
Paid social	Scale tested creative and proposition routes	Incremental contribution after creative and media cost
Partnerships	Reach relevant work and design communities	Qualified traffic and assisted conversion

COMMERCIAL CONSEQUENCE

Use owned product proof to improve conversion, then let CRM and referral establish repeat economics before expanding paid reach.

SOURCES: A6

ASSUMPTION

Measurement before scale

LEADING	Proposition comprehension, qualified click-through, product-page progression
BEHAVIOURAL	Net conversion, average order value, repeat and referral
COMMERCIAL	Contribution after returns, fulfilment, media and implementation

COMMERCIAL CONSEQUENCE

Leading indicators must move before the plan releases larger media or inventory commitments.

SOURCES: A6

ASSUMPTION

The Next 12 Months

Months 1-3

Establish the truth

Verify economics, interview customers and test three proposition routes.

Months 4-6

Prove the proposition

Run controlled site, product-story and CRM tests with contribution guardrails.

Months 7-9

Build the engine

Codify winning creative, CRM and referral mechanics and assess capacity.

COMMERCIAL CONSEQUENCE

A staged validation programme protects cash while the business replaces assumptions with evidence.

SOURCES: A4, A5, A6, A7, C1

ASSUMPTION

NARRATIIVE

Evidence and assumptions ledger
